### Reach – School App

This application facilitates communication between teachers and students. Students can upload assignments, apply for leave, access SOS services, view attendance, communicate with management, and receive circulars and reminders. Meanwhile, teachers can assign tasks to students, take attendance, engage in chat with students, and utilize SOS functionality.

**Technologies Used :** Flutter, Dart, Express Js, Node Js, MySQL

### Peace River

This project is designed to capture patient details from a form image and store them as PDFs. The information filled out by patients is saved in the database in PDF format for future reference.

**Technologies Used :** Swift UI, Express Js, Node Js, MySQL

### Photo StudioApp

This project revolves around connecting customers with studio owners through the app. Customers can use the app to book slots for their events. After the event concludes, they can conveniently select photos and videos for their albums within the app.

**Technologies Used :** Flutter, Dart, Express Js, Node Js, MySQL

### E-Commerce Application – Demo

This WooCommerce project is designed for online shopping, encompassing features such as purchasing products, adding favorites, and integrating payment methods, among other functionalities. RazorPay was seamlessly incorporated for payment integration.

**Technologies Used :** Flutter, Dart, Woocommerce APIs

### GreenPen – Education

GreenPen is an innovative Virtual Learning Management System (VLMS) that simplifies the creation and administration of various learning activities. Whether it involves constructing online classes, evaluating students, fostering collaboration, or monitoring achievements, GreenPen streamlines the process.

**Technologies Used :** Flutter, Dart, Firebase, GetX

### Tamil BTG – Spiritual

This app offers spiritual readings in Tamil with a focus on stories centered around Lord Krishna. It serves as an advanced e-magazine with a range of features, including dark mode, subscription options, swipe-through functionality, and filtered sections.

**Technologies Used :** Flutter, Dart, Woocommerce APIs
